Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CUBA—*Manzanillo.*—Two weeks ended March 31, 1897. Estimated population, 15,000. Total deaths, 43, including enteric fever 4, and scarlet fever, 1.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 33 great towns of England and Wales during the week ended April 17 correspond to an annual rate of 17.9 a thousand of the aggregate population, which is estimated at 10,992,524. The highest rate was recorded in Salford, viz, 28.1, and the lowest in Croydon, viz, 9.5 a thousand.

London.—One thousand four hundred and eighteen deaths were registered during the week, including measles, 27; scarlet fever, 8; diphtheria, 30; whooping cough, 43; enteric fever, 2, and diarrhea and dysentery, 9. The deaths from all causes correspond to an annual rate of 16.6 a thousand. In greater London 1,852 deaths were registered, corresponding to an annual rate of 15.4 a thousand of the population. In the "outer ring" the deaths included 7 from diphtheria, 6 from measles, 20 from whooping cough, and 6 from scarlet fever.

Scotland.—The deaths registered in 8 principal towns during the week ended April 17 correspond to an annual rate of 22.3 a thousand of the population, which is estimated at 1,549,907. The lowest mortality was recorded in Leith, viz, 18.0, and the highest in Perth, viz, 26.0 a thousand. The aggregate number of deaths registered from all causes was 665, including scarlet fever, 4; diphtheria, 6; measles, 39, and whooping cough, 39.

INDIA—*Singapore.*—Month of February, 1897. Population, 56,000. Total deaths, 588, including phthisis pulmonalis, 64, and beriberi, 100.
